

# ValleyNet™ Digital Radio Network

**The Push-to-Talk Radio Network  
that Drives the San Joaquin Valley**

**Cook's Communication** has served central California and the San Joaquin Valley since 1946. We provide a full range of equipment sales and service, as well as a robust, modern radio communications network we call ValleyNet™.

We serve the valley from south Sacramento to Bakersfield. A fleet of mobile service techs and support specialists are ready to serve you – wherever you are.

Our customers range from public fleets to private industry, and represent nearly every commercial and industrial service category.

**In an industry as fast changing as wireless communications, it can be tough to form long-term, hard-working relationships. That's not the case for Cook's Communications customers.**

Our first radio network hit the airwaves more than 60 years ago and today represents the most advanced network available in the area. Network users rely upon ValleyNet™ for everything from private industry applications to highly efficient fleet operations.

The push-to-talk, one-to-many network format gives you the ability to communicate with one person – or everyone on the team. And the intuitive operation and efficiency ValleyNet offers are so solid that first-time users often comment on the savings they achieve in time alone.

## ValleyNet™ Digital Coverage

- Offers dependable coverage
- Allows for instant communication with multiple users – or just one
- Assists with state communications compliance
- Does all this – and more – affordably, far below cellular rates

## Service and Staff to Support You

 While our network provides the coverage you need, the rest of the Cook's team is ready to help you select the equipment that best suits your needs. We've spent decades working with customers in virtually every industry, and we're happy to share our knowledge with you.

### TALK

- Local and intra-state coverage
- Multi-site connectivity
- Flexible set-up for single or multiple talk-paths
- Unlimited talk time

### DATA

- GPS & related services
- AVL & other fleet management
- Custom solutions

### TEXT

- Radio to radio
- Radio to dispatch
- Radio to mobile device
- Web-based text messaging service

## Delivering Affordability, Reliability

Affordability, reliability and usability merge in Cook's radio network. This system offers the most flexible and clearest radio-based communications available. It was built specifically for the demands of those working in fast-paced, highly mobile settings that demand instant, turnkey communications access without channel-setting or other adjustments. Network coverage is extremely strong, allowing for dependable service even from within buildings and warehouses.
